# Glasstone®

## Glasstone® Shower Tray, Basin, Laundry Tub & Wall Panel

Glasstone® manufactures SMC/BMC, a composite material composed of resin, fiberglass, filler etc .It needs a 500~3000 tone compression machine with metal mould to press at 150~160°C. Glasstone® have a solid surface, high glossy, matte or stone effect finish for easy cleaning.

Glasstone® is used to make parts for planes ,trains、 cars、 machines etc, and have been used to make bath tub , shower tray, basin, laundry tub and wall panel in USA, Japan. Canada, Australia and Europe.

Glasstone® has a lighter and stronger design. Which will not twist. As it is press by metal mould, the size, angle, and line is copied in a very precise manner. Radius and the mold angle can be very small and precise. It is flat,colorful, no scratches, cost-effective. All of these make it much better than ceramic, polymarble and acrylic.

All Glasstone® bathroom products carry a 5-year guarantee.
